Site Date: 09/04/2018 Fitter arrived on site in response to emergency call out to find the barrel had moved over to the left by 10mm and the motor sprocket had moved over the right by 8mm causing the drive chain to have been running out of alignment and ride off which then caused the safety bearing to engage. Fitter found that the motor adaptor had been bent out of alignment. Fitter managed to get one drive chain back on and very slowly wound the shutter up. Fitter turned power off. Shutter is out of action until new parts are fitted. Shutter left open. Additional work to be carried out as soon as possible. Quotation to follow.
